

Age	8	3	6	4	9	2	3	5	6	3
Price	45	210	100	190	33	267	190	134	109	235

The estimated regression model:

$$\hat{y} = 315 - 33.41x$$

For $x=7$, $\hat{y} = 315 - 33.41 \times 7 = 81.13$

So, the point is $(7, 81.13)$
